Pack Asia 2012

Pharmapack 2012

Pack Asia 2012 - will attract thousand of regions buyers to search for the latest innovation as well as the opportunity to view an up-to-date international range of packaging machines, equipments and material that is uequaled anywhere else in quantity and quality, whether as the manufacturers of food stuff, confectionery, beverage.

Beverages and pharmaceuticals goods or technical equipment take this chance to get all the information and development not just products, but also serves related equipment to meet the demand of an increasingly intensified and competitive packaging economy.

The packaging industry provides products range from glass containers, paper, cans, plastic, biodegrable and packaging. World demand for food containers is expected to increase 3.8% per year of \$115 billion to 2013, according to a report by the Bharat Book Bureau. Factors contributing to the rising demand include growth in global food output and convenience - oriented products due to fast paced lifestyles.

The leading event... established in 1985, and now in its 21st Presentation Malaysia's longest running and most established trade show for Packaging, Processing, Pharmaceutical, Food & Beverage, Retail Pack and Packaging Technology.

**PHARMA
PACK 2012**

Asia's Pharmaceutical market has demonstrated a highly positive and consistent growth rate in the last few years. It will continue to show strong growth potential in the future, due to the increasing prevalence of disease rising; healthcare spending and greater affordability. The global pharmaceutical market will reach \$929 billion in 2012, which is an equivalent compounded annual growth rate of 5.5% over five years, between 1999 to 2007. The global pharmaceutical market grew to \$712 billion of 10%, while it increase to 10.7% year- on- year in 2007.

HELD IN CONJUNCTION WITH:

**PLASTIC
PACK 2012**

The plastic packaging market for food and drink will continue to out perform by other materials, reaching \$172.1 billion globally by 2014 up from \$147 billion in 2010. The exhibition will present the latest technology for producing, filling and packaging beverages and liquid food - including raw materials and logistic solution.

**BEVERAGE/
BREW 2012**

Beverage packaging design has shifted to cost and cost-related factors such as material reduction, light-weighting and improvements in line efficiency, filling techniques and cost effectiveness and quality. The rapid growth of food and beverage market indicates a sustainable demand for packaging processing and technology.

**RETAIL
PACK 2012**

Competition at the retail level has increased enormously since 2008, due to deteriorating economic condition falling consumer spending power, and rising employment in Asia. This has resulted in strong downward pressure on product, pricing and packaging costs. The demand for bags and pouches has benefit from an environmentally friendly from image, as they are often associate with reduced packaging efforts, compared to rigid containers, lighter, smaller and have lower energy requirement during production.
